Community Health Improvement Plan

Community Resiliency

Outcome: Fewer incidents of Adverse Childhood Experiences

Goal: Develop a General SMART Goal around ACEs (e.g. lower rate of children in foster care, fewer parents incarcerated, increase in social supports for families, etc.)

	Key Strategies	Key Actions	Key External Partners [†]	Key Process/Outcome Measures	Timeline
1.	Coalition Building	Foster or participate in a group of interested stakeholders to assess current levels of knowledge about the science of trauma, toxic stress and resiliency and its impact on community well-being and to lead initial planning and implementation	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Develop a community-wide plan for raising awareness about the impact of trauma and toxic stress on health, including pathways to healing, well-being and equity.	TBD
		Build alliances/cross-sector partnerships among organizations in a position to advance the goals identified by the group of stakeholders	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number of organizations involved or participating in addressing ACE's work.	TBD
		Tapping into what other partners in the community are already doing to address ACEs and joining forces to build and support their efforts.	Schools Hospitals Local employers Health departments Chamber of commerce Community organizations	Increase the number of connections made with established partners and collaborations in the community served.	TBD

	Key Strategies	Key Actions	Key External Partners [†]	Key Process/Outcome Measures	Timeline
			Residents		
2	Awareness	Develop a common narrative with stakeholders about how trauma and toxic stress are impacting community well-being, and identifying community strengths to build upon, using the “Pair of ACEs” framework	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	A set of data and messages that demonstrate the unique impact of trauma and toxic stress in the community, and the unique strengths to leverage for healing, well-being and equity	TBD
		Coordinate public education campaigns to increase knowledge and awareness around the science of trauma, toxic stress and resiliency. This strategy may combine public service announcements (PSAs) on television, radio, or online/social media with billboards and posters	Schools Hospitals Media outlets Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number of individuals reached using the different modalities of communication	TBD
		Creating awareness through social marketing using advertising principals targeting the common social beliefs about poor health outcomes, while promoting pathways to healing, well-being and equity	Schools Hospitals Media outlets Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number of individuals reached using the different modalities of communication	TBD
		Develop and deploy a standard curriculum for building awareness among community organizations and residents about the impact of trauma and	Schools Hospitals Media outlets Local employers Elected officials	Number of organizations and individuals reached with the curriculum	

	Key Strategies	Key Actions	Key External Partners [†]	Key Process/Outcome Measures	Timeline
		toxic stress, including pathways to healing, well-being and equity	Health departments Chamber of commerce Community organizations Residents		
		Coordinate the dissemination of information on successes and barriers with partnerships/collaboratives around the ACE work.	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number of partners actively participating in partnerships and collaboratives around the ACE work	TBD
		Identify and implement opportunities for increased regional coordination between partners representing the communities	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations	Increase the number of partners involved in regional initiatives Increase the number of meeting opportunities with deliberate and actionable items identified and implemented or in the process of implementation	TBD
3	Policy	Develop a strategy for engaging residents in advocacy agenda	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number of residents engaged in the work of decreasing the number of ACEs	TBD
		Educate policy makers on the importance of supporting policies that help address the ACE's	Schools Hospitals Local employers	Number of policy makers educated about ACE's.	TBD

	Key Strategies	Key Actions	Key External Partners [†]	Key Process/Outcome Measures	Timeline
			Elected officials Health departments Chamber of commerce Community organizations Residents	Number of meetings help in educating policy makers about ACE's	
		Include and seek for opportunities to work with the media outlets. Media advocacy can help to shape the way social issues are discussed in the media. This strategy can help influence how people talk and think about certain issues and potentially guide policies.	Schools Hospitals Media outlets Local employers Elected officials Health departments Chamber of commerce Community organizations Residents		TBD
		Co-develop with residents/patients best practice ACE policies and ensure their implementation in the community settings	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number community members educated on new or existing policies before implementation in community settings	TBD
		Advocate for policies addressing Adverse Childhood Experiences at the health systems and community settings	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number of best practice policies advocated and approved in regard to ACEs in the last 12 months	TBD

	Key Strategies	Key Actions	Key External Partners [†]	Key Process/Outcome Measures	Timeline
4	Education	Strengthen the effectiveness the communities/health systems collaboration efforts by aligning communications around education strategies to address ACE's	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increasing the number of entities working on similar goals in addressing ACE's. Increase the number of coordinated communications around ACE's going our through the collaborations	TBD
		Develop and distribute educational resources with strategies geared towards evidence-based programming for use by health systems and community organizations to become trauma informed	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase the number of educational resources distributed to entities of interest and as needed using different channels	TBD
5	Best Practices	Adverse Childhood Experiences Tool ARTIC Tool : Attitude Related to Trauma Informed Care Scale PARTNER Tool : Program to Analyze, Record, and Track Networks to Enhance Relationships THRIVE Tool - Tool for Health & Resilience in Vulnerable Environments Pair of ACEs tools Alive and Well Organizational Assessment Missouri Model for trauma-informed care	Schools Hospitals Local employers Elected officials Health departments Chamber of commerce Community organizations Residents	Increase number of organizations adopting and utilizing the evidence based tools and incorporating them into their work	TBD
