Self-Assessment Questions	YES	NO	N/A	Date/Initials	Comments
Does the hospital have criteria to determine the number of infection preventionist(s)/infection control professional(s) and other resources needed to operate effectively?					
A-0748 COP §482.42(a)(1)					
Does the infection prevention and control program:					
a. have documented policies and procedures based upon national standards and evidence- based protocols?					
 b. have policies and procedures to prevent and control infections not just between patients and personnel but also for all patients, personnel and visitors? 	٥				
 employ methods for prevention and control of infection transmission within the hospital and between the hospital and other 					
healthcare settings? d. does the hospital track both hospital and community onset cases of C-Diff and MRSA?	٠				
A-0749 COP §482.42(a)(2)					
Does the hospital infection prevention and control program include appropriate policies and procedures to ensure that the hospital provides and maintains a clean and sanitary environment in all areas of hospital including all inpatient and outpatient areas?					
Does the hospital ensure a clean and sanitary					
environment by monitoring:					
a. housekeeping,b. maintenance repairs, renovation and construction activities					
c. onsite laundry facilities					
d. food storage, preparation, serving and dishrooms (kitchen)] [
e. refrigerators, freezers and ice machinesf. air handlers,					
g. autoclave rooms					
h. venting systems					
i. inpatient rooms					
j. all treatment areas including outpatient k. laboratories					
I. waste handling					
m. surgical areas (inpatient, ambulatory and					
outpatient)

A-0750 COP §482.42(a)(3)					
Do the hospital infection control policies and					
procedures ensure that any infection control issues identified by public health officials are					
appropriately investigated and reported?					
A-0750 COP §482.42(a)(3)					
Do the hospital infection prevention and control policies and procedures include:					
a. all hospital settings and locations including					
ambulatory care and outpatient settings?					
b. all programs or services lines provided by the hospital?					
c. detection, investigation and control of infectious outbreaks?					
d. provisions for infection prevention control					
program evaluation and revision of the					
program, when indicated either by changes in standards of practices or changes in hospital?					
Document in comments section the national					
standards or evidence-based protocol that each					
infection prevention and control policy and					
procedure are based upon?					
A-0750 COP §482.42(a)(3)					
Does the hospital have a water management program that:					
a. is based on ASHRAE standards and CDC					
toolkit?					
b. includes a hospital risk assessment to identify					
Legionella and other waterborne pathogens? c. does the water management program specify					
testing protocols and acceptable ranges for					
control measures?					
d. includes documentation of water					
management program activities including testing results and corrective actions taken	U		_		
when testing is out of range?					
A-0750 COP §482.42(a)(3)					
Does the infection prevention and control program reflect the scope of services offered					
throughout hospital including all departments,					

Self-Assessment Questions	YES	NO	N/A	Date/Initials	Comments
service lines, inpatient/outpatient services, locations and any contracted services?					
Does the ICP program have mechanisms in place to respond to hospital changes such as addition of services or locations?					
Is the ICP program consistent with infection control standards of practice and appropriate to scope and complexity of hospital services?					
A-0751 COP §482.42(a)(4)					
Is the infection preventionist/infection control professional responsible for: a. ensuring the infection prevention program complies with nationally recognized					
guidelines? b. developing, implementing, auditing and monitoring compliance with policies,					
procedures and IC program requirements? c. developing an active system for identifying, investigating, reporting and preventing the spread of infections and communicable					
diseases? d. communicating and collaborating with the hospitals QAPI program, antibiotic stewardship program, other departments and services in the performance of quality assurance and infection control education activities?					
A-0772 COP §482.42(c)(2)(i) A-0774 COP §482.42(c)(2)(iii) A-0776 COP §482.42(c)(2)(v) A-0777 COP §482.42(c)(2)(vi)					
Is the infection prevention and control professional responsible for: a. all documentation, written or electronic, of					
the infection prevention and control programall infection prevention and control program surveillance, prevention and control					
activities? c. communication and collaboration with the QAPI program on any infection prevention					
and control issues? d. prevention and control of HAI including auditing for compliance with applicable policies and procedures by staff.					

Self-Assessment Questions	YES	NO	N/A	Date/Initials	Comments
A-0773 COP §482.42(c)(2)(ii)					
Is the Infection preventionist responsible for competency-based training and education of the following hospital personnel and staff on the practical applications of infection prevention and control guidelines, policies and procedures: a. medical staff b. contracted staff					
c. all employees					
A-0775 COP §482.42(c)(2)(iv)					
ANTIBIOTIC STEWARDSHIP PROGRAM					
Does the antibiotic stewardship program have a designated individual who: a. is qualified through education, training, or					
experience in infectious disease and/or antibiotic stewardship as the leader of ABS? b. is appointed by the governing body?					
c. has been recommended by the medical staff and pharmacy leadership?					
d. has evidence of ongoing qualification through education, training, experience or certification?					
e. has developed and implemented antibiotic stewardship policies?					
Document in comments section date of governing body approval.					
A-0760 §482.42(b)(1)					
Is there documentation the antibiotic stewardship					
program: a. is coordinated with the infection prevention and control program, QAPI, medical staff,					
nursing services, and pharmacy services? b. promotes evidence-based prescribing and usage of antibiotics to reduce incidence of adverse consequences of inappropriate antibiotic use (including but not limited to adverse drug events, CDIs, growth of					
antibiotic resistance)? c. documents improvements including sustained improvements in proper antibiotic usage including reduction in CDI and antibiotic resistance?	٠				
d. improved proper antibiotic usage in all departments, all services throughout the hospital?
